Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Selection of a person in charge of inventory	The first part that plays an important role in company inventory system namely the person in charge	This form is caused by importance of items that exists so that the company must choose a person in charge	It is because company is obliged to receive a complete and periodic inventory report	Which makes me feel to identify the amount of inventory available and inventory in and out to the valuation of product inventory
PS-2	Monitoring the level of inventory	It can be ascertained that the company will avoid depreciation of inventory	But it is used to avoid storing too much stock	It can lead to the abandonment of existing supplies	Which make me feel it is good if every company conducts forecasting to determine the right amount of stock
